

Hypnotic indie rock with 80's influences

Morgendust blends elements of alternative rock, pop, post-punk and some 80's to create a unique and captivating sound. Think of The War on Drugs, The Boxer Rebellion, Future Islands and Tears for Fears.

Morgendust's songs are often introspective and thought-provoking, tackling themes of longing, loss, and self-discovery. The band's use of layering and experimentation gives their music a sense of complexity and depth, making for a truly immersive listening experience.

With their dynamic and diverse sound, Morgendust is a band that is sure to appeal to fans of alternative and more experimental music. Their music is both challenging and accessible, making them a band to watch out for in the future.

'A superb, wide-ranging album!

Morgendust have outdone themselves here!'

[Eclectic Music Lover.com - Palm Springs USA](https://www.eclecticmusiclover.com)

Friends for some time now, musically experienced and seasoned enough to tell a story or two. Also enough self knowledge and stage experience to realize 'forever young' is not the ultimate goal.

Starting in 2018 they released their first singles in 2019. Their debut 8-track EP ***Storm Will Come*** was released on September 13th 2019 in a sold out Hedon, in their hometown Zwolle.

Covid forced the band in 2020 to work in alternative ways. They wrote and recorded (in separation) four singles: the dark [Alien](#) about the issue of refugees (bass player Dario fled 25 years ago from Bosnia to the Netherlands), the sunny [Sundays](#) about a dark relationship and with [Hands](#) they honored the makers of our society. [Easy Way Out](#) is an uptempo pop-rocker about former lovers, premonitions and escape routes.

'With ease, this debut album reaches the level of the world's biggest post-punk rock bands!'

[> Nieuweplaat.nl](#)

In 2021 they were hailed by [Intercontinental Music Awards](#) as 'Best of Europe' in the category European Rock 🙌

One year later (2022) the album **14** came out, a mashup album with 8 tracks remixed with their own work. Including [Don't Give Up](#) by Peter Gabriel & Kate Bush (with Cindy Oudshoorn - ex-Kayak) **Alive & Kicking** (Simple Minds) and **Enjoy the Silence** (Depeche Mode). Songs that were hits when they were 14 years old...

At the same time they released a short [14 minute film](#) about the making of **14**.

In that same year Morgendust parted with their second drummer and started working on their much anticipated debut album with just the four of them.

Patrick Pozderski joined in the summer for the live shows in the future. Together with his father on the bass; a family affair extraordinary!

'Open windows and doors and turn the volume up to the maximum. Yes, that's the kind of album this is. One that makes me extremely happy'

[> Progwereld](#)

Their debutalbum [Morgendust](#) was released in March 2023 in a sold out Hedon Zwolle and was followed by the 'New Land Tour' which brought the band [to the balkan](#) in Bosnia & Herzegovina, Croatia and Serbia.
